

Hasini Gangoni

Data Engineer

Jersey City, NJ • 862-822-9670 • hasinigangoni01@gmail.com • Open to Travel

PROFESSIONAL SUMMARY

Stakeholder-focused Data Engineer with 2+ years of consulting and client-facing experience delivering scalable data engineering and low-code analytics solutions. Proven ability to translate complex business requirements into practical data workflows, partnering directly with stakeholders to drive adoption and solve real-world data challenges. Hands-on experience with Snowflake, Databricks, PySpark, and Python across cloud environments. Comfortable working in fast-moving implementation projects and communicating technical concepts clearly to non-technical audiences.

EXPERIENCE

Data Engineer | Merck

June 2025 – Present

- Serve as a primary technical point of contact for business stakeholders, gathering requirements and translating them into low-code and Python-based data engineering solutions.
- Lead data pipeline design and implementation using Snowflake and Databricks, supporting enterprise analytics and reporting workflows for cross-functional teams.
- Develop PySpark and Python scripts for data transformation, feature engineering, and pipeline automation across cloud data platforms.
- Collaborate closely with non-technical stakeholders to define data models, validate outputs, and ensure solutions align with business goals and workflows.
- Document data pipelines, workflows, and methodologies to support knowledge transfer and ensure long-term maintainability of solutions.
- Participate in ongoing platform implementation projects, providing hands-on support and troubleshooting to keep timelines on track.

Data Engineer | Accenture

Aug 2022 – May 2025

- Delivered client-facing data engineering solutions across multiple engagements, working directly with stakeholders to scope requirements, design pipelines, and present findings.
- Built and maintained ETL pipelines using Apache Spark, PySpark, and Python to process large-scale structured and semi-structured datasets across AWS and Snowflake environments.
- Designed low-code and reusable data transformation workflows to reduce manual effort and empower business users to self-serve analytics.
- Optimized SQL queries and data models in Snowflake and PostgreSQL, improving reporting performance and data accessibility for business teams.
- Integrated data from diverse sources (APIs, RDBMS, Kafka, flat files) into unified, stakeholder-ready data models used for dashboards and analytics.
- Automated data quality checks and pipeline monitoring using Airflow and DBT, proactively communicating issues and resolutions to stakeholders.
- Partnered with data scientists and analysts to deliver clean, well-documented datasets supporting decision-making across business units.

EDUCATION

M.S. in Information Systems — Pace University, Brooklyn, NY

Sep 2022 – May 2024

B.Tech in Electrical & Electronics Engineering — Vishnu Raju Institute of Technology, Hyderabad

Aug 2018 – Jul 2022

TECHNICAL SKILLS

Data Platforms: Snowflake, Databricks, AWS Redshift, S3 — cloud data warehousing and lakehouse architecture

Programming: Python, PySpark, SQL, Java, Scala — pipeline development, data transformation, and automation

ETL & Orchestration: Apache Spark, Airflow, DBT, Kafka — batch and streaming pipeline design and orchestration

Low-Code & BI Tools: Dashboard and reporting tools (Looker, Tableau); reusable low-code data workflow design

Cloud Platforms: AWS (S3, Redshift, Glue, EMR, EC2, RDS), GCP, Azure

Databases: PostgreSQL, MySQL, MongoDB (NoSQL), Cassandra, Snowflake

Stakeholder Skills: Requirements gathering, solution scoping, cross-functional collaboration, technical documentation

Tools: Git, GitHub, Airflow, DBT, Jenkins, Linux/Unix

CERTIFICATIONS

- AWS Certified Data Analytics – Specialty
- Databricks Certified Spark Developer
- Oracle Certified Java Programmer
- Python for Data Analysis (pandas, NumPy) — Udemy
